## PHILOSOPHY

Drawing from years of experience in exclusive lighting, Pieter Adam started his line of lighting as an alternative to the volatile, temporary and trendy mass production items available everywhere. His main focus was on quality and exclusivity with durability, craftsmanship and expertise being high on his priority list.

With a clean slate and full of ideas we began the Pieter Adam Collection with the key words contemporary, exclusive and stylish serving as the main design focus. Every detail and every piece was carefully thought out leaving nothing to chance.

Quality through expertise. Our many years of experience with bronze founders, glass blowers, granite refiners, and silk weavers enables our highly skilled craftsmen to make special limited edition pieces. As a result, we are able to meet special needs and requests, such as complete custom designed lighting plans for special projects.

Perfection is paramount in the Pieter Adam collection. From the silk chords to the metal housing for each fitting, a Pieter Adam piece is assembled with scrutiny and passion. A showpiece in your interior radiating international splendour.

## TAMTAM

As a certified furnituremaker and designer, Pieter has a lot of passion for furniture. In his search for new and eco-conscious materials, Pieter found lots of inspiration in the opportunities straw marquetry offers. Pieter let his creativity run wild and created a furniture line with this unique material.

This series of luxurious tables are made with high quality materials, such as brass, leather and straw marquetry. Pieter combined modern- with geometrical shapes, which makes this collection easily integrates in its environment while leaving a great impression.

Straw marquetry is a very unique and specific craft which is a labor-intensive process. Each straw will be cut by hand before it get soak in cold and hot water. Afterwards the straws are ironed and coloured in a bath. By ironing it, the straws get that colour gradient which makes these tables absolutely stunning!

# TAMTAM

Item nr. FPA 300

## COLLEC(T)ABLE

Pieter Adam's Collec(t)able series comprehends a sophisticated design that exudes elegance and style, this series of tables are perfectly suitable for any interior. These tables can perfectly be combined with Pieter Adam's lighting series, which will create a stylish and cohesive interior design!

This line of furniture pieces contains both rectangular and round-shaped tables and are finished in antique silver or antique gold. The table tops are made from eco-conscious materials, like bamboo, selenite, straw marquetry and feature an geometric pattern.

An unique look can easily be created by mixing different kinds of tables together with different kinds of table tops. The possibilities are endless, allowing you to unleash your creativity and design your own unique table!

## CIRCUM

Pieter regularly retreats to his design studio to create new lighting and furniture pieces. With lots of experience and inspiration, he created the Circum series. This series is in perfect harmony with the TamTam and Collec(t)able series.

Characteristic for this series are the brass details, which are visible in each design. The dressers and sofa are beautifully finished with high quality leather on the inside, and luxury eco-conscious materials on the outside.

All pieces within this series can be made with lots of different materials and finishes in various colours. With our wide range of materials and finishes, this series is perfect for customization.

## BAROCTOPUS

The world underneath the surface is an amazing and intriguing one, housing some of the most beautiful and curious creatures. Taken from the sea world, this piece of both art and furniture combines a highly decorative aesthetic with functional purpose. The curly tentacles of the octopus even remind us of the curved shapes of baroque. The suckers on the underside of the tentacles show the artist's keen eye for detail that is carried out through the full bottom of the sculpture.

# BAROCTOPUS

**Item nr.** FPA 150  
**Materials** Casted Brass, glass (*Glass plate size on request*)  
**Dimensions** ø100 x H52cm (*incl. 10 mm tempered glass plate*)  
**Finishes** Natural brass (*Other finishes on request*)

## LUXURY BOXES COCOON & MACAROOON

Pieter has expanded his collection of accessories with two kinds of luxury boxes, both are truly remarkable. The luxury boxes, called Cocoon and Macaroon, are crafted from high-quality materials, such as casted brass, leather, straw marquetry. When opening the box you will be amazed by the black and white geometric pattern made of polystone.

These exquisite boxes are the perfect accessory to add a touch of luxury, elegance and sophistication to any space.

## COCOON LUXURY BOX

**Item nr.** FPA 620

## KARMA CHAMELEON

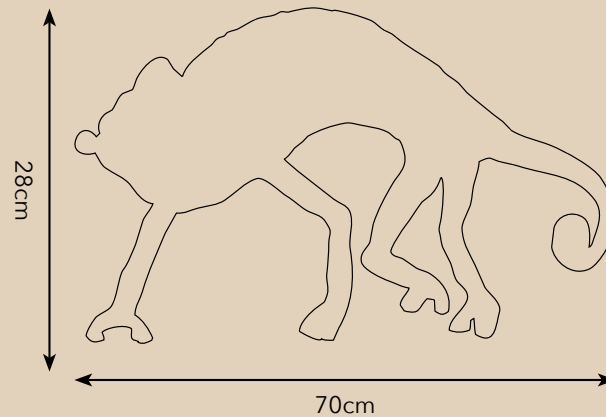

Every once in a while, Pieter retreats to his happy place; his atelier. For him, as an artist, there is no greater joy than to create something from a large piece of wax using just his bare hands. This sculpture succeeds in being true to nature while also showing the artist's characteristic hand. With its colour-changing skin, specialised eyes and long tongue, the chameleon is quite the distinguished outsider. A creature that is unique in both the animal world as well as the world of interior!

# KARMA CHAMELEON

**Item nr.** PA 602  
**Material** Casted Brass  
**Dimensions** W70 x D21 x H29 cm  
**Finishes** Natural brass, Dutch silver\*

*\*For images of the other finishes visit our [website](#) >*

## VOLCANO CANDELABRA

What a fascinating design this large candelabra! The designer took an edgy take on the classical shapes of candleholders, connecting a timeless design with a raw texture and yet lush appearance. This contrast is exactly what makes this design piece so interesting. The rough surface with its natural, organic irregularity suggests the brass was allowed to find its own way, like lava does. The actual form remains symmetrical though and the natural brass or Dutch silver finish provides that lustrous and chic look. The large number of candles will bring the warmth of the brass and the intimate flames to any interior environment. The effect is pure magic.

Item nr. PA 603  
Model Volcano Candelabra  
Material Casted brass  
Dimensions 42 x 42 x H52 cm  
Finishes Dutch silver, natural brass\*

PIETER ADAM

## SEA TREASURE

The Sea Treasure collection by Pieter Adam captures the mystery and allure of the deep sea, bringing its timeless beauty into your home.

This exclusive series of lighting is crafted from casted brass and finished in a natural brass finish, reminiscent of hidden treasures resting on the ocean floor.

Each piece features hand-blown glass, evoking the delicate beauty of luminous pearls.

The warm, ambient glow transforms any space, blending artisanal craftsmanship with a sense of discovery.

The Sea Treasure is more than a lighting collection—it's an ode to the ocean's elegance, offering a subtle yet luxurious statement for any interior.

## CURVA CULTA

The Curva Culta series is Pieter Adam's newest line of luxurious lighting. Pieter got inspired by the work of architect Zaha Hadid and fashion designer Iris van Herpen, which you will see back in the flowing and wavy shapes of the lighting pieces.

A combination of materials is used, such as high quality aluminium, brass and blown glass. The bodies are nicely finished in nature inspired colours. With its bulky curves, the table lamps, wall lamps and hanging lamps, get that distinctive and unique look and twist. This series is very eye catching and perfectly suitable in many interiors.

## MELTING PARADISE

Adding a tropical touch to your interior doesn't have to mean adding an enormous leafy plant. With the Melting Paradise series you're instantly transported to dreamy exotic beaches. Crafted from brass, the leaves and the Murano glass with gold leaf reflect the light beautifully. These super decorative statement pieces will certainly be eye-catching and creating a relaxed ambience in any interior. The sun will come out everywhere you put them- we just cannot get enough of these lights!

Sockets 17x G4 LED  
Finishes Natural brass

## CARNIFOREST

An ode to nature's beautiful ingeniousness. The gorgeous exterior of the flesh-eating plant conceals its carnivorous nature. Thankfully, Pieter's new design "CarniForest" is not as ruthless as its source of inspiration. Rather, it creates a fairy-like atmosphere. The plant's lid provides the light with a refined reflection. Surrounded by the most beautiful small elements from the forest, the stunning protective shape is what gives this lamp its fabulous magical look.

Item nr. PA 950  
Model CarniForest hanging lamp  
Material Casted Brass  
Sockets 9x G4 LED + GU5.3 LED spot  
Finishes Natural brass / Dutch silver\*

## WORN TORCH

Pieter's preferred method of designing and creating is working manually on an idea and seeing it come to life right under his hands. For this new line of wall lamps, Pieter worked with an unusual material to give shape to his designs. By using polyurethane foam and sanding it down, the designer was able to really finetune his sought-after, "imperfect" shape. Being very three-dimensional and asymmetrical, the wall torch's appearance subtly changes with every change of angle. The typical organic irregularity and softened edges provide its elegant silhouette with a slightly worn-out look. The glass on the other side contrasts the torch with its sleek, geometrical form resembling diamond facet. The matt finish gives the glass, and thereby the light, a beautiful diffusion.

The WornTorch series consists of a single and double wall light. The designs have been brass casted and polished for a chic look and finished in either natural brass or Dutch silver. The length of these wall lights makes them an excellent choice for those seeking to emphasize the height of their space.

Item nr. PA 770  
Model WornTorch 2l  
Material Casted Brass

## MYSTERIOUS BAMBOO

Nature can work in mysterious ways, with its grace and curiosity serving as a great source of inspiration. In various Asian cultures bamboo is regarded a symbol for uprightness and tenacity. The plant is often endowed with traits as integrity, elegance, and optimism. The new Mysterious Bamboo series represents Pieter Adam's own interpretation of this noble plant, enriching it with a playfulness, joy and light-heartedness. The integrity and elegance in the detailing shows a great admiration of nature. An excellent choice for anyone looking to implement a botanical, mystic touch to their interior, perfectly fitting the present zeitgeist.

## MELTING PARIS

The Melting Paris series combines nature's radiance with organic shapes in a contemporary style by employing a raw surface of bronze. Recognizable shapes are restyled to achieve their own look.

In contrast with today's mass production, Pieter Adam wants his designs to show his personal touch and signature. This is clearly visible in the Melting Paris series where each piece is handcrafted in wax literally showing the artists' finger prints. When looking at a Melting piece one can see the organic, unrestricted shape; nothing is straight or smooth. These pieces are characteristic of detail and achievement. The possibilities bronze casting offers are being employed in all its facets.

The freedom of creativity and inspiration is ultimately found in creating something by just using your hands. It is the purest way of designing. Away from all mass produced items and searching for the authentic craftsmanship only traditional craftsmen can achieve. Sustainable, with love for his craft and the end product, a Melting Paris piece truly gives a peek in the artist's head.

## TWIGGY

Pieter Adam's Twiggy line comprehends contemporary design and sustainability. Twiggy is a collection based on nature's purest grace. Inspiration was found in the organic, capricious shaping of twigs. Pursuing nature's strength in growing strong and solid with its unequalled, beautiful and characteristic appearance was serving as the main source of inspiration for the designer. Fair materials like brass and glass emphasize the sustainable nature of this collection. Organic shapes casted in brass and crafted with the utmost attention to detail combined with mouthblown glass providing a subtle reflection of the halogen light. Finishes like silver and gold give this lighting series its specific and exclusive radiation.

Look, feel and admire: enjoy nature's beauty where no twigs are alike.

## ROSEDALE

A real Pieter Adam piece plays with different materials. The elegance and lightness of the blown glass contradict the shape of the metal which gives a Rosedale piece its distinctive and playful quality thus ensuring its own identity and recognition. The glass beautifully absorbs any colour and the combination of materials engages the light in a very unique way.

The Rosedale series encompasses transparency and exclusivity offering plenty possibilities when you need a real glamour piece. Whether placed in a five-star hotel lobby or in your residence, these eye catchers complement any interior.

Timeless and with a great adaptability, a Rosedale piece easily integrates in its environment while leaving a great impression through its stylish appearance.

## LE SOLEIL

Pieter Adam's Le Soleil design encompasses the shape and warm shine of a radiant sun. Nature's beauty has always been a main source of inspiration for the Pieter Adam collection and this was no different for the Le Soleil design. A natural shape made of bronze, with a closed inner circle and an outer circle scattering rays of light. This sculpture has a very pleasant and warm appearance. It can be adjusted to the wall, as well as to the ceiling, ensuring an unique diffusion of light. Le Soleil is available in four sizes and in the finishes bronze, silver and gold. Contemporary and subtle design are characteristic for the Pieter Adam collection and for this, Le Soleil is no exception.

PIETER ADAM  
CONTEMPORARY DESIGN

## ORGANIC ATOMIC

As its name indicates, the design of Organic Atomic is reminiscent of the smallest particle that an element can be reduced to. This lighting object resembles the organic both systematic composition of everything we see around us. Based on the organic work of art, the spheres are connected in a way that the whole forms an impressive and striking piece of lighting. The Murano glasses with silver leaf are specially blown and designed for this new Pieter Adam series. Sculpted by hand and casted in brass, the connecting pieces can be linked in many ways providing endless possibilities for customization. This leaves lighting architects the opportunity to give their own interpretation to this design and fit it perfectly into their lighting projects.

## PAUEMENT

The special look and feel that the combination of brass and ceramics creates, is fully exploited in this new series "Pavement". The tension between the smooth ceramics and the raw structure of the brass is as pleasant as it is elegant. The Pavement structure is build up from all kinds of small 'pebbles' of which no one is alike. All these pebbles have been carved out one-by-one by hand in wax and placed criss-cross for a beautiful, natural effect. The shape of stacked parts, alternating between brass and ceramics, show the powerful effect of pattern and repetition.

## BRONX

The Bronx series exemplifies lighting with an international radiance. The Pieter Adam logo, circular interconnecting links, returns frequently within these series. These rings are very recognizable and give this series its own identity.

Inspiration for this series was found in refined traditional workmanship on the one hand and the dynamic development of the new era on the other resulting in an unpretentious design employing geometrical patterns and clean lines.

The Bronx style resembles the Art Deco looks. In the late 19th and early 20th century, the Art Deco workmanship was highly valued and appreciated. Also for this series, a lot of patience and expertise is demanded from our bronze founders. A laborious process, recurring in for example the separate moulding of each ring, which is subsequently melted onto the connecting piece. Polished, silver/gold plated and varnished, each piece is made with the utmost attention to perfection.

Item nr. PA 801

## MELTING AMSTERDAM

Our capital Amsterdam has a rich history and has been a cultural melting pot for many centuries. As a result, the city has its own identity with freedom and individuality being its main traits. This is also true of the new collection designed by Pieter Adam™. The copper-tinted chandeliers of the Golden Age were a source of inspiration for this unique line of lighting fixtures. Tradition and craftsmanship are applied in a contemporary way bringing the past, present and future together. Materials such as gold, silver, Murano glass, silk and brass casted in sand are used for their superior quality. The Dutch design of Pieter Adam™ supplies the originality.

## MELTING FEZ

With the Melting Fez series, Pieter Adam shows a new angle on combining varied authentic aesthetics. The sharp-edged curls, a Gothic decorative element, blend beautifully with the Moroccan feel of the lantern. The transparent, delicate fabric combined with the toughness and fickleness of the brass side lines, create a pleasant tension. The light sheltered in the stretched fabric adds a softness and warmth to the mystic sense this design exudes. Mysterious yet frivolous, this lush piece of characteristic lighting merges wonderfully in an ancient ambiance, complementing it with a contemporary twist.

Item nr. PA 501  
Model Melting Fez hanging lamp  
Material Casted Brass  
Sockets 1x E27 max. 60Watt  
Finishes Dutch Silver / Canadian Gold / Dark Bronze\*

\*For images of the other finishes visit our website >

## MELTING FLORENCE

Melting Florence is Pieter Adam's first series of lighting that can be used both indoors as well as outdoors. The series consist of lanterns with a distinctive twist. The history of lanterns is long standing. Italian lanterns were Pieter's source of inspiration for designing his own version of this centuries-old form of light. As usual , he shows a completely own silhouette corresponding his language of form and shape. The distorted lines and the surprising organic shaping create a completely new interpretation of an ancient type of lighting.

Pieter Adam hopes you will enjoy these objects as much as he enjoyed making them. Fantasy does not know any boundaries.

Item nr. PA 232 - PA 233

### ONYX

Onyx is a colourful stone with a luxurious and exclusive appearance. It is special because of its crystal structure, but also because of the pattern, transparent appearance and colour gradient.

### AGATE

Agate is a gemstone known for its natural ground colours. A typical characteristic of agate is its ring-shaped appearance.

### SELENITE

Selenite is a near-gemstone variant of the mineral gypsum. The natural material has a special and luxurious appearance.

### VENEER

Veneer is a thin layer of wood, it could be used around a piece of furniture to give the piece of furniture a wooden look.

### CERAMIC

Ceramic is made from natural materials. Ceramic is a very strong and versatile material.

### MARBLE

Marble is one of the best-known types of natural stone. It has various colours, ranging from black, grey, yellow and white. The difference in structure and lighting makes marble very special. Its density also makes it very durable, marble is a good investment in your interior. Marble goes well with other natural materials and colours, such as copper, brass and wood.

### MICA

Mica is made from a crystallized mineral extracted and it has a shiny and metallic glow.

### PARCHMENT

Parchment is a kind of leather, which is light, flexible and strong.

### SAND STONE

Sand stone is a natural sedimentary rock consisting of compressed grains of sand and minerals. Sandstone comes in a variety of colours.

### TRAUERTINE

Travertine is a natural limestone that is recognizable by its veins and holes. The appearance of the natural stone provides a calm and luxurious look.

### SPECIALS

Special patterns and materials to use in your custom made piece.
